

MEDLIOR

HEALTH OUTCOMES RESEARCH

Position: Health Economics Consultant (permanent or contractor)

Location: Calgary, Alberta

Job Summary

Medlior Health Outcomes Research Ltd. (Medlior), invites applications for a Health Economics Consultant position.

Reporting to the Principal or Senior Consultant, the consultant is responsible for leading the development, design and conduct and delivery of health economic-focussed research projects for our clients. This role has customer-facing consulting responsibilities, and internal-facing responsibilities with other members of the Medlior team. The Consultant will support the successful growth of Medlior customer base through creative and timely provision of fit-for-purpose deliverables. Given the nature of the position, applicants should be comfortable with shifting priorities and a variable work-load.

Applicants for both permanent and contractor positions will be considered. Candidates with the ability to be office-based are preferred; home-based candidates will be considered.

Specific Responsibilities

- Perform systematic literature reviews and data extraction relating to health-economic topics
- Development of technical documents and manuscripts for peer-reviewed journals
- Lead proposal development for health economics projects
- Draft and ensure timely execution of project plans
- Successfully deliver projects to highest quality standard and within expected timelines and budget
- Provide technical and strategic consultation to clients and guidance to staff and contribute to development and maintenance of client relationships
- Oversee conduct of the studies from kickoff to delivery of final product
- Lead customer and internal project meetings
- Mentor and develop junior staff in consulting services
- Comply with all Medlior policies and procedures
- Work in the best interests of Medlior and in accordance with the Core Values

Qualifications

- Demonstrated experience in health economics within the pharmaceutical industry or consulting to pharmaceutical companies
- Demonstrated modelling skills, knowledge and practical applications of all relevant methods in health economics
- A proven track record of developing fundamental health economics deliverables for clients including, such as: systematic literature reviews, meta-analyses, cost-effectiveness analyses, budget impact analyses, HTA submissions & value dossiers

MEDLIOR HEALTH OUTCOMES RESEARCH

- Strong technical education in health sciences, with experience in outcomes research
- Specific experience in the design and delivery of health economic models (e.g. cost-effectiveness, cost-utility, cost-minimisation, cost-benefit, budget impact, etc.) would be considered an asset
- Strong problem-solving ability, turning challenges into opportunities
- Ability to translate technical concepts to clinicians and other health sciences professionals
- Excellent written and verbal communication skills
- Leadership skills, able to supervise, oversee and critically appraise work of team members
- Demonstrated ability to connect with people and build relationships across multidisciplinary teams
- A mature attitude, with initiative and a firm commitment to job ownership
- An eye for details
- Collaborative and persuasive, with good listening skills

Education

Graduate degree in Health Economics with 3+ years experience in health outcomes research consulting or the pharmaceutical industry.

Additional Information

Salary will be based on qualifications and experience.
